Claim Objections

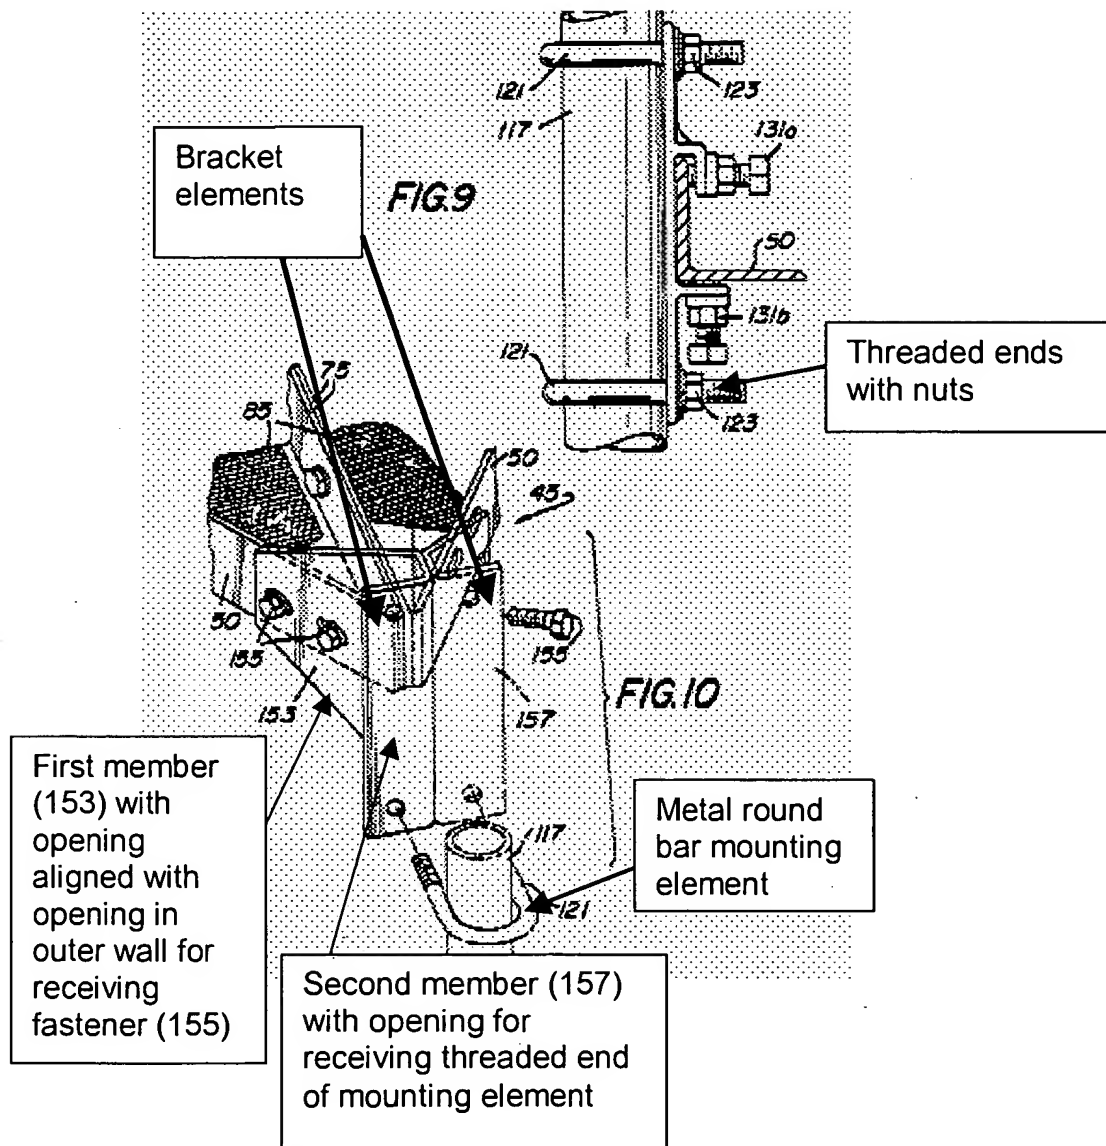

Claim 10 is objected to because of the following informalities: Applicant need to close the parenthesis of " (29.2 " in claim 10, line 8. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 10-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10, "new means " on the third line before last is vague and indefinite. If applicant means nut means then appropriate correction is required. "The second bar" of claim 14 which depends from claim 10 lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

Claims 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Calabro (U.S. patent no. 5,954,305). Calabro disclosed all the claimed features of applicant's claimed invention (see examiner's illustration below). Additionally, Calabro discloses that explicitly "although the mounting plate 157 is shown in FIG. 10 as having rounded through holes for mounting, these mounting holes could also be horizontally slotted to enable horizontal adjustment of the U-bolts 121 and antenna support tubes 117 mounted thereon." (see Col. 7, lines 3-7).

Response to Arguments

Applicant's arguments filed 3/24/2005 have been fully considered but they are not persuasive. Applicant's argument that it would have not been obvious to modify the second opening of Calabro such that it is elongated is not persuasive. Examiner has further discovered evidence that Calabro himself in his discussion of figure 10 embodiment that the second opening can be slotted for horizontal adjustments of the U-bolts and antenna support.
